Green ENERGY Conclave

The 21st Century Version of Green Energy

DISTF 3rd Green Energy Conclave-2023 is an initiative to provide a platform for young scientists, entrepreneurs, investors and policymakers to showcase their work for recognitions and possible support by government and industry alike. The idea of the DISTF Green Energy Conclave-2023 was adopted at the 1st DISTF-2020 Festival, where we have organised a session on Green Energy. DISTF Green Energy Conclave-2023 is going to be held in DIT University during the 4th Dehradun International Science and Technology Festival, 27th-29th October, 2023.

DISTF 3rd Green Energy Conclave-2023 on "Green Energy and Sustainable Development :Issues, Challenges and Prospects specially focusing on the Emerging Uttarakhand as a Hub of Green Energy Source" is being organized by Society for Research and Development in Science, Technology and Agriculture (SRADSTA) during the 4th Dehradun International Science and Technology Festival (DISTF-2023). Sustainable development is the idea that human societies must live, and meet their needs, without compromising the ability of future generations to achieve their requirements. The conclave aims to stimulate the exchange of information on current research, developments and sharing of relevant experiences in the specific areas of Sustainable Development and Green Energy. Conclave will also provide a platform to discuss about the investment opportunities, policies and area of prospective.
